

RETURN OF THE ORACLE

The AI oracle's immediacy and lack of context accords well with its new location - or better still locationlessness. Prophecies no longer come from the mouths of witches in the woods or a priestess on the cliffs of Delphi. They are pronounced constantly from all the computers that accompany and surround us - and, in the case of Alexa, inhabit our living rooms.

"THE AI ORACLE DOESN'T CREATE ORDER IN SOCIETY FROM ITS MARGINS. IT IS ORDER, TO BE CONTINUALLY CONSULTED AND OBEYED"

ARTIFICIAL INTELLIGENCE.
